

Okta Activation URL takes user to Okta hosted screen to set password. Following completion user will be redirected to Infinity OLB where they can login using their new credential ensuring Accounts are automatically provisioned. (visible in Spotlight)

Registration done asynchronously after capturing Username and Password from user via emailbased OTP.

Update not yet captured here... DCO will not capture any OLB creds. name, email, mobile will be passed to Infinity to be used to default the uname. Password will be provided by the user during the activation process.
