

Top section only populated if accounts selected (If user has no pre-selection and skips guided questions, page will only show the "Explore" carousel.

Assume we enter at this page and skip questions SB1 and SB2 if user had previously selected accounts (in dotcom site) before launching SB DCO form

Could be one or two new pages here - after selecting accounts, before going on to complementary (cash mgmt) products.

Assumes that all clients will get online/mobile banking and a debit card (for the applicant)

Suggestion from Product to use a tabbed display if possible here (3 tabs)-

Suggestion from Product to use a tabbed display if possible here (3 tabs)-

New cart summary page to show product cards for

- 1) Previously selected account(s)
- 2) Included complementary products (online/mobile banking + debit card)
- 3) Other selected complementary products (if applicable) - or just carousel (below) if no other complementary products selected.

Product Carousel (for complementary products) would need to have tabs for "Payment Solutions" and "Receivable Solutions" (or similar - wording TBC)
