2.4 Dependencies

- Business, Personal Self-Serv & Motive

N/A

2.5 Known Issues

#	DCO	Type	DCO Inputter	Description	Note
1.	DCO-2538	Defect	BSS, PSS	BSS and PSS- Back button focus issue when using keyboard control	The issue is seen when the "Back" button is focussed using keyboard, please refer to the JIRA ticket for additional details and steps to reproduce the issue.
2.	DCO-2537	Defect	PSS	PSS NTB - "Find the product that meets your needs" screen shifts to the left side of the screen	When the screen opens in PSS channel, the "Chequing" and "Saving" items are misaligned. Please refer to the JIRA ticket for additional details and steps to reproduce the issue.
3.	DCO-2518	Defect	Motive, PSS, BSS	Motive, BSS and PSS- When user clicks next in each page, the screen seems to slide to the left	Please refer to the JIRA ticket for additional details and steps to reproduce the issue.

2.6 Additional Information/Testing Notes

- While testing the screen reader functionality, the testers used NVDA.
- While testing colour contrast issues, the testing team used colour contrast analyser (CCA).
- Please connect with Accutive BA in case of any issues with UI. We have some UI fixes ongoing which will be fixed in the upcoming deployments.

3 Reporting Bugs

When reporting Defects, please follow instructions below:

1. Select Issue Type: Bug
2. Summary: Prefix with page issue is on and include short description
3. Description: Include Steps to reproduce, Actual and Expected results
4. Priority: (see our guidance on selecting a priority in section 7 below)
5. Environment: Device/Browser/OS information (and if it is across all, provide list)
6. Test Data: Provide test data used to reproduce this defect
7. Linked Issue: Select JIRA item that's it should be linked.

4 Defect Severity Levels

The severity of a defect decides the impact on the application

Level	Description
Severity 1 or Critical	Critical/Showstopper/Blocker: This affects, or materially fails to comply with the acceptance criteria for, critical functionality or critical data. This does not have a workaround.
Severity 2 or High	High: The defect affects, or materially fails to comply with the acceptance criteria for, major functionality or major data. It has a workaround but is not obvious and is difficult.
Severity 3 or Medium	Medium: The defect affects minor functionality or non-critical data. It has an easy workaround.
Severity 4 or Low	Low: The defect does not affect functionality or data. It does not need a workaround; no impacts to productivity.

5 Defect Priority Levels in CWB JIRA Board

Priority decides the order in which defects need to be fixed:

Level

• Highest
• High
• Medium
• Low
• Lowest
• Important
