User Story Description

As a Generalist SME

I want to log out
So that when I am done with the session, I can log out of my session

Acceptance Criteria

1. The user is able to view log out option after they logged in to the portal
   a. The log out option should be available on all pages of the site
2. The user is able to click and to confirm on logging out
3. The user is able to be logged out and back to unauthenticated state

- [ ] unknown: is there any session time-out?

Specs by Example & Business Rules

#	Given	When	Then	Business Rules
1	The user is in the log in state	The user clicks on the log out CTA	The user is asked to confirm log out	
2	The user confirms log out	The user is logged out	The user is brought to the log in landing page	

Dependencies

Same as VCOO-163.

Confirm that:

1. The User will take an action (click on "Log Out" button to disconnect from VCOO app)
2. The User will be automically redirect to the "Log In" page after 15 minutes in case he did not take any action on the the VCOO app)
3. Does the user will be kicked out of VCOO when he closed the app, or his session will not be expired (will continue as if he did not close the app)?
